

AeroFlow Limited Warranty Policy

This policy applies to all AeroFlow-branded equipment sold on or after 1 January 2024, including the AeroFlow X100 and AeroFlow X200 dehumidifier lines.

Standard Coverage

AeroFlow warrants each unit to be free from defects in materials and workmanship for a period of two (2) years from the date of delivery. During this period AeroFlow will repair or replace defective parts, including labour.

Compressor Coverage

The sealed compressor assembly carries extended coverage of five (5) years from the date of delivery. Compressor coverage includes parts and labour during the first two (2) years and parts-only for years three (3) through five (5). Compressor failures attributable to manufacturing defects, including start relay defects, are covered for the full five-year term.

Exclusions

This warranty does not cover damage caused by operation below 5 degrees C ambient, supply voltage outside 200-240 V, unauthorised modification or service, or failure to follow the published maintenance schedule.

Claims Procedure

Warranty claims must be submitted through the AeroFlow service portal within thirty (30) days of fault detection and must include the unit serial number and proof of purchase. Fleet customers purchasing ten (10) or more units in a rolling twelve month period qualify for advance replacement: a replacement unit ships before the failed unit is returned.
